

Laminator Approved Materials – QFun Laminator SL888

Material Information:

- Only paper products allowed in the laminator
- Maximum finished laminating thickness is: 0.6mm
- Maximum laminating width is: 320mm
- 3mil or 5 mil thickness laminating pouches are allowed in the machine.
 - The laminating pouch should only be 2-5mm larger than the laminating material size.

Project Sizes:

- Projects can be the following sizes:
 - Legal, letter, business card, and photo (A3, A4, A5, and A6)
 - The maximum material width is 13 inches = size A3
- Please double check with a Staff member if using thicker paper

Paper types:

- The following paper types are allowed in the laminator:
 - Light paper stock (regular notebook writing paper, printer/copy paper, business report, resume paper)
 - Text paper stock (magazine paper, flyers, brochures)
 - Cardstock paper (thicker uncoated paper: invitations, greeting cards, business cards, high quality flyers and brochures)
- Paper thickness allowed up to 14 pt.
- Dial Caliper available as needed to measure the paper thickness before laminator use.
 - NOTE: Cardstock thickness at the Studio = 0.3 mm
